

YOUR ROUTE TO BUILDING A COSIER HOME MADE SIMPLE.

ENERGY100 IS A NEW AND EXCITING PILOT PROJECT SPONSORED BY ON5 TO HELP EMPLOYEES SAVE ENERGY AT HOME.

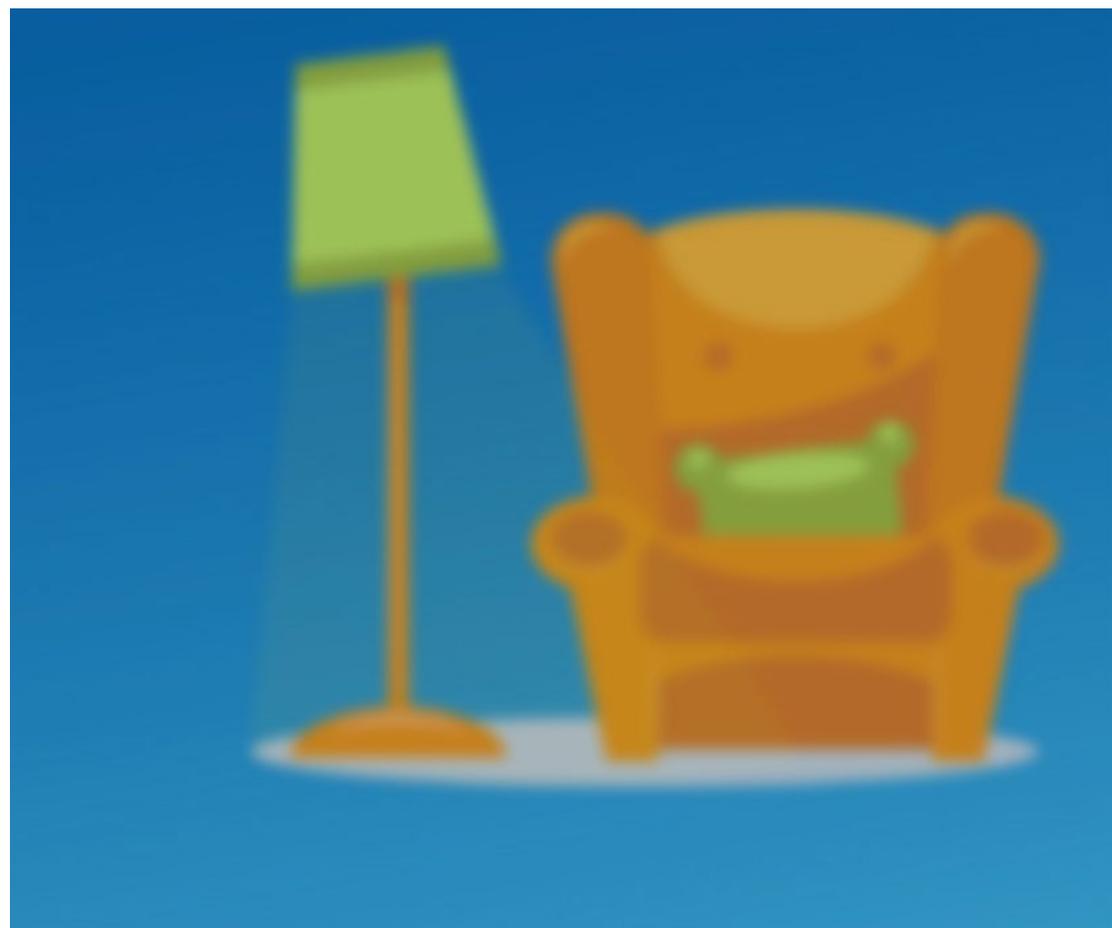

We have launched an impactful programme to enable staff to live in healthier homes and to increase their disposable income, through encouraging reductions in their energy spend and use. On average, energy bills account for approximately 7% of an individual's income and the cost of heat & power is on the rise.

Through engaging your employees, with Energy100's Onsite Workshops and Online Hub you will contribute towards the UK's efforts to reduce energy waste and achieve ambitious carbon emissions targets, whilst making energy efficiency a little more interesting!

BENEFITS TO YOUR COMPANY

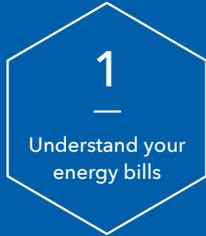

- Creates a sense of community and engagement
- Encourages energy efficient behaviour at work too by building on knowledge
- Tracks potential impact on carbon and energy reductions
- Offer as an additional perk and improve your employees' well-being
- Represents a key pillar of your positive social and environmental strategies

ENERGY100 WORKSHOPS

The 30-minute interactive workshop aims to establish attendee motivations, as to why or what would make them want to save energy in the first place? The session then covers three key elements with personalised energy saving advice and tips shared along the way:

[BOOK A WORKSHOP](#)

ENERGY100 HUB

The Energy100 Hub follows on from the workshop and simplifies your employees' route to building a cosier home, the platform utilises gamification techniques and rewards to incentivise people to take action to reduce their gas and electricity consumption.

The Hub offers energy advice and services, providing the information needed to add value to your employees' homes with

access to the Energy Saving Trust - Community Home Energy Check Tool through the Energy100 Community.

Making pledges to adopt energy-savings actions, earning points and tracking progress on the platform, your employees will gain the chance to win prizes in return for their engagement in energy saving.

"Looks like ON5 has found a great way to engage with energy users and raise awareness of how everyone can do their bit to reduce energy use and save money."

Jon Saltmarsh,
Head of Technical Energy Analysis, Department of Business, Energy and Industrial Strategy (BEIS)

Department for
Business, Energy
& Industrial Strategy

“We called in the experts from ON5 to facilitate energy efficiency workshops as part of our Reshaping Tomorrow Week, which is Wates’ framework for delivering sustainability in our business and for our clients. The workshops were practical and inspired our employees to think about the energy they use in their homes, how it can be reduced and how it can be bought better and cleaner by using switching websites to choose standard or renewable energy suppliers. The workshops met our objectives of supporting our staff to become more aware of Reshaping Tomorrow and gain a greater understanding of how to take practical action at home and at work”

Luke Smith,
Sustainability Manager, Wates Group Services

HOW IT ALL WORKS

For a small contribution of £100 per workshop, your employees will benefit from a 30-minute energy-saving workshop, delivered from the comfort of your workplace.

Our energy expert can engage up to 10 of your employees per session, which works out to just £10 per person with free access to the online hub developed and funded by ON5.
